# TAILWIND
## VOICE & DATA

# Simplify Enterprise IT and Save With TailWind

TailWind offers technology expertise that adds concrete value to large enterprises – from installation through completion.
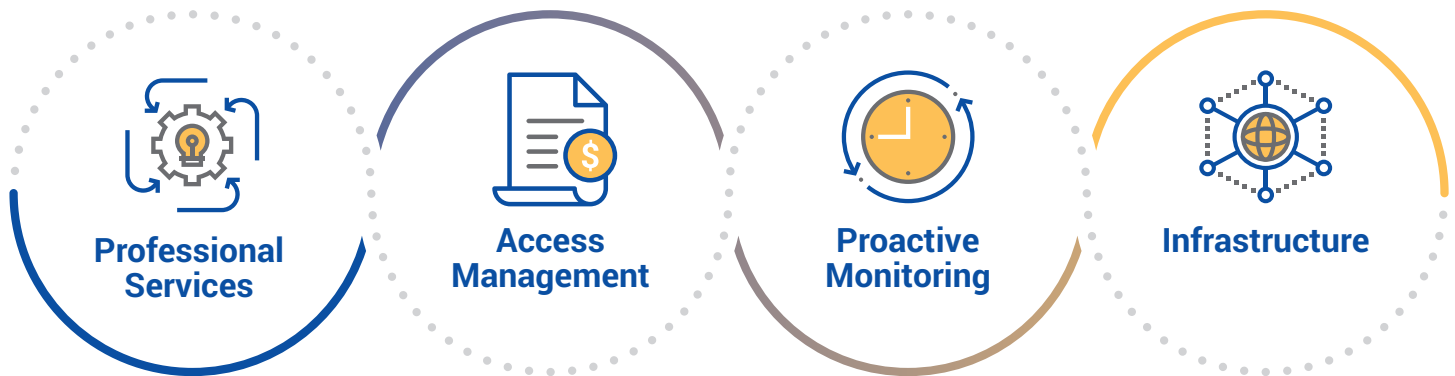

## Who We Are

TailWind is an IT service provider that helps multi-location businesses take the burden of IT management – across your entire organization – off your shoulders.

## What We Do & How We Help You

We save businesses time and money by consolidating all your IT vendors into one point of contact and one bill.

### Professional Services

Our project managers work directly with your team to coordinate and manage all the steps of your IT projects, from concept and initiation through project launch, performance monitoring, and project close.
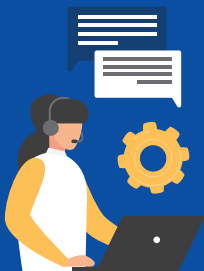

### Access Management

We create wholesale relationships, order the internet on your behalf, and deliver single invoices for your data connections.

### Proactive Monitoring

Benefit from 24/7/365 proactive monitoring and notification and an online portal that enables monitoring, tracking, and reporting capabilities with all TailWind-provided circuits.

### Infrastructure

Benefit from complete expertise including structured cabling, rack and stack, gear integration, wireless access points, and more.

## Rely on TailWind

➢ Peace of mind with access to our Network Operations Center 24/7

➢ Expert asset management and stage & configuration services save time and minimize disruption

➢ Our experienced engineering staff helps multi-location businesses with relocations and expansions, new installations and network upgrades, and more – nationwide
